- International Master second level "Aesthetic Medicine and Growth Factors"

SHAPE.IT

l'eccellenza in Endodonzia nel terzo millennio

CORSO GRATUITO PER GLI ASSOCIATI NYU ITALIAN GRADUATES ASSOCIATION YOUNG

Dr. Andrea Balocco

Dr. Marco Bucci

Dr. Gianluca Fumei

Dr. Fabio Piccotti

Dr. Giacomo Suardi

Nel corso della vita professionale l'Odontoiatra deve modificare di continuo il proprio modo di operare in virtù dell'evoluzione delle conoscenze e del miglioramento di tecnologie e materiali utilizzati quotidianamente. Lo scopo è ottimizzare il risultato clinico ad esclusivo favore del paziente.

Tra tutti i settori dell'Odontoiatria, l'endodonzia è forse quello che più ha beneficiato negli ultimi anni dell'introduzione di nuovi prodotti e sistematiche che hanno influenzato in modo importante la pratica quotidiana e consentito nuove tecniche e procedure operatorie. Lo sviluppo di nuovi strumenti canalari rotanti in NiTi ha permesso di avere protocolli sempre più facilmente ripetibili in ogni situazione anatomica con grande sicurezza e basso rischio di frattura.

Proprio in quest'ottica, l'introduzione delle leghe trattate termicamente ha consentito di avere strumenti sempre più performanti e rispettosi dell'anatomia endodontica.

Gli attuali orientamenti della moderna Endodonzia sono sempre più volti ad un'idea di "minimamente invasivo", nel rispetto dell'anatomia originale dell'elemento dentale. Questa filosofia dovrebbe essere perseguita in tutte le fasi del trattamento endodontico che vanno dall'apertura al restauro post endodontico e, a maggior ragione, dev'essere centrale nello step della sagomatura dove la preservazione della dentina pericervicale sappiamo avere un ruolo importante nel mantenimento del dente a lungo termine.

CHAIRMEN

Prof. Francesco INCHINGOLO, MD, DMD, MPH, OMFS.

- Associate Professor of Odontostomatological Diseases
- Director of the School of Specialization in Orthodontics
- Doctor of Medicine, specialized in Public Health, Dental Medicine
